

Chiesi Inhaler Recycling Toolkit: Sticker Template

This sticker is an example from the 'Take AIR' recycling scheme and must be adapted with details of your local scheme. It is intended to be used to provide promotional information to support your recycling scheme in pharmacies. We would recommend placing the sticker in clear view for patients and nearby to the counter-top display unit, and also to place it on prescription bags as a visual cue to encourage inhaler recycling for both collection and delivery patients.

Please note: this is an example only – this design, name and branding is not for local reuse

Dimensions: 3mm x 4.5mm
